

CROSS-CUTTING MACHINES

LINDOVA S20 BSKL OCH S21 BSK

Pneumatic, powerful cross-cutting machines for vehicular and servicing applications.

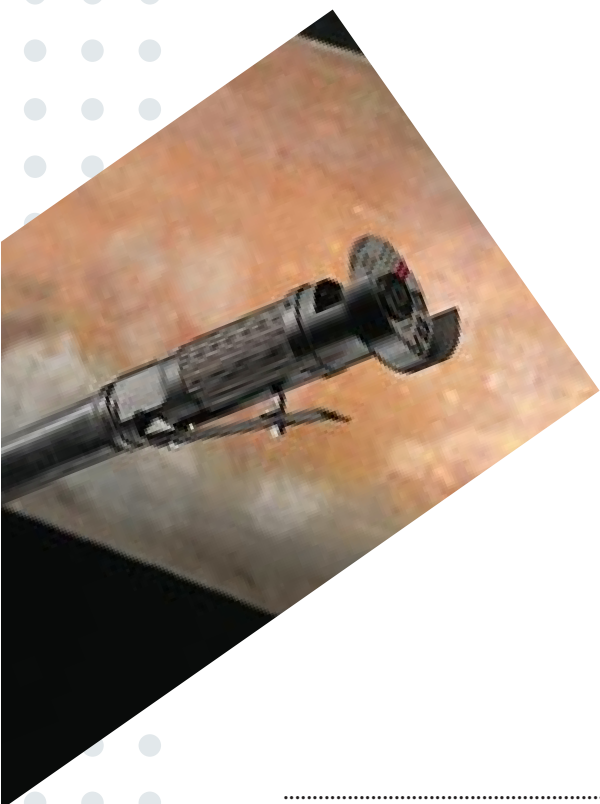

The Lindova S20 BSKL and S21 BSK are air hydraulic cross-cutting machines with \varnothing 75 mm cutting wheels.

The S20 BSKL is a two-handed model with a long spindle. This model has separate pivoting for the rotor axle and the spindle.

The S21 BSK is a one-handed model with a short spindle mounted directly in the rotor axle.

The cutting wheel mounting is extremely stable, which means minimum vibrations and a long life-span. The function handles are fitted with safety guards.

And because we both design and manufacture the S20 BSKL and S21 BSK Cross-cutting machines ourselves, we can guarantee both a complete stock of spare parts and rapid service when required.

	S20 BSKL	S21 BSK
Application	Vehicular/Serviceing	Vehicular/Serviceing
Length	245 mm	195 mm
Weight	1.2 kg	0.9 kg
Output	0.3 kW	0.3 kW
Min. hose	8 mm	8 mm
Air consumption	9 l/s	9 l/s
Revs.	20.000 rpm	20.000 rpm
Cutting wheel	\varnothing 75 mm	\varnothing 75 mm
Art. no.	8402	8411

Vibration level: < 2.5 m/s² **CE**
Noise level: 75 dB (A)
